Why SCADA is Broken & How Ignition Can Fix It

There are many pain points associated with SCADA software, and Ignition by Inductive Automation® addresses each of those concerns. Below are the 20 biggest SCADA pain points along with the specific way that Ignition solves them. Point by point, you can clearly see why Ignition is the best SCADA solution available.

Ignition takes what you have and makes it a connected and well-oiled machine.

Workability

Pain Points

- 1 Only works with specified Windows versions and service pack levels.
- 2 Strict hardware requirements
- 3 Can't create database front-end GUIs without programming hacks.
- 4 No support for relational databases.
- 5 Designers versions are out of sync with runtime versions.
- 6 Project backups and restorations are time-consuming and frustrating.

Solutions

- Ignition is cross-platform, including every version of Windows.
- Runs well on server-class, desktop, laptop, and embedded hardware such as Raspberry Pi.
- Ignition gives you the tools to develop almost anything.
- Ignition supports popular SQL databases.
- Designers and runtime versions are always in sync.
- Back up with one click and restore projects in seconds.

Ignition takes what used to require days, weeks or hours to complete and does it in minutes.

Pain Points

- 1 Installation takes hours, days, or weeks. Even activation is a nightmare.
- 2 You can't download the software today.
- 3 Deploying applications to runtime clients is tedious and takes clients offline.
- 4 You have to shut down to add functionality.
- 5 Designers don't support concurrent development.
- 6 Activation licensing is a headache.

Solutions

- Ignition server installs in under 3 minutes. Runtime clients deploy in seconds.
- Download the full version anytime in minutes.
- Single-click deployment, updates in seconds, clients stay online.
- Hot-pluggable modules allow you to add functionality without shutting down your system.
- Unlimited designer clients allow multiple developers to work on any projects at the same time.
- Simple, fast, 24/7/365 activation. Transferring licensing is a snap.

Stop throwing your money away and start saving with Ignition.

Pain Points

- 1 Runtime clients are sold and installed separately, by the seat.
- 2 Prices skyrocket when you add tags and runtime clients.
- 3 You have to buy before you develop; no unlimited-time trial available.
- 4 Getting an actual price is very difficult.
- 5 Extremely high support fees
- 6 Integrators charged for tech support
- 7 Expensive beyond any practical use
- 8 Designers are sold and installed separately, by the seat.

Solutions

- Ignition comes with unlimited tags and clients.
- Download the full version of Ignition for free and refresh trial as long as you want.
- Prices are listed on the Inductive Automation website.
- Support contracts are reasonably priced and include 90 days of free phone support
- Free tech support for integrators - after all, they sell the product!
- Affordably licensed by the server
- Designer application included out of the box. Launch any number of additional designers for free and work concurrently.

Time

Money

Ignition Is Powerful

With so much going on in your facility every day, the ability to accurately track it all is essential to your success. However, all the data in the world is of little use without the ability to easily display it, powerfully analyze it, and quickly act on it. Let Ignition put a world of control and monitoring functionality at the tips of your fingers. Visit our site today to find out more.

Ignition Is Simple

From the bottom up Ignition is designed to overcome the pain points of old SCADA software and make it simpler to get things done. Ignition is cross-platform compatible and web deployed so you can install it in minutes to any device equipped with a web-browser. You can also update and expand your system to all clients instantly, without shutting the system down. See for yourself how Ignition can make your life simpler; download it for free today.
